📍 Rawalpindi, Pakistan

SUMMARY

I am a motivated Software Engineering student with extensive hands-on experience in MERN stack development, software system design, and user-centered UI/UX projects. I excel at delivering innovative solutions through projects such as e-commerce platforms and hotel management systems, utilizing modern frameworks like Spring Boot and design tools like Figma. My creativity, problem-solving skills, and collaborative mindset have contributed to my academic and personal growth

EXPERIENCE

Operations Team Member & Vice Head

FAST-NUCES

📅 03/2023 - 03/2025 📍 Islamabad, Pakistan

University Society

- Successfully led event logistics and operations for university-wide events, ensuring timely execution and resource management
- Coordinated with cross-functional teams to streamline event workflows and improve efficiency

Production Team Member

FAST-NUCES

📅 03/2023 - Present 📍 Islamabad, Pakistan

University Society

- Took the lead in planning and creating engaging content for major university events
- Demonstrated leadership by mentoring new members and fostering collaboration within the team

Invigilator

British Council

📅 02/2024 - 03/2025 📍 Islamabad, Pakistan

Examination Invigilator

- Managed examination setups and adhered to strict protocols to ensure fairness and integrity during tests
- Communicated effectively with teams and candidates to maintain a smooth examination process

EDUCATION

FSc: Pre-Engineering

Punjab College of Science Blue Area

📅 08/2019 - 08/2021 📍 Islamabad

Bachelor's Degree Software Engineering

Fast-NUCES

📅 08/2022 - Present 📍 Islamabad

CERTIFICATION

Cloud Computing Course

NAVTC Certification

Invigilation Certificates

British Council

KEY ACHIEVEMENTS

✓ Academic Projects

Successfully completed various academic projects, including an e-commerce platform and a hotel management system, showcasing my skills in MERN stack development and software design

SKILLS

C/C++	C#	Data Structures	
Docker	Ecommerce	Figma	
Functional Testing		Git	GitHub
JavaScript	Integration Testing		Java
Jenkins	JIRA	JUnit	Kubernetes
PHP/Laravel	Linux	MongoDB	
Manual Testing		MVC	ML/NLP
OpenGL	PHP	Python	React
SpringBoot	SQA	SQL	TestNG
Next.js	Node.js	RESTAPI	
Express.js	.NET	Jenkins	MySql
AI	Video Editing		

PROJECTS

E-commerce Clothing Brand

📅 01/2023 - 02/2023

E-commerce Clothing Brand project focused on MERN stack development

- Designed and developed a fully functional e-commerce platform for a clothing brand using MongoDB, Express.js, React, and Node.js
- Implemented features such as product catalog, shopping cart, and secure payment processing

Ludo Game Development

📅 03/2022 - 04/2022

Ludo Game Development using C++

- Developed a fully interactive Ludo game using C++ and implemented graphic libraries for a seamless user experience
- Integrated essential gameplay functionalities, including dice rolling, player turns, and win conditions

CERTIFICATION

Operations and Production Team Roles

University Society Certificates

Internship Certificate

Web and IT Internship Certificate

LANGUAGES

English

Fluent

Urdu

Native

ADDITIONAL EXPERIENCE

MERN stack Development

Freelancing

📅 2025 📍 Rawalpindi, Pakistan

E-commerce Marketplace Web App

- Built a responsive online marketplace with user, seller, and admin panels. Users can register, browse and search products, chat with sellers, and place orders. Sellers can list and manage products. Admin can manage users, products, and listings.

PHP/Laravel Development

Freelancing

📅 07/2025 📍 Rawalpindi, Pakistan

Ecommerce Clothing Brand

- Designed and developed a user-friendly online store where customers can browse and buy clothes. Implemented features like product filtering, shopping cart, and secure checkout.

PROJECTS

Event Management System

📅 05/2022 - 06/2022

Event Management System project developed using C#

- Created an Event Management System application using C# and the Microsoft .NET framework
- Incorporated features like event scheduling, attendee management, and real-time updates

Hotel Management System (HMS)

📅 07/2022 - 08/2022

Hotel Management System focused on software design and architecture

- Developed a Hotel Management System using Java and Spring Boot (MVC framework)
- Designed system architecture to optimize functionality and maintain scalability

Food Delivery Routing Optimization

📅 09/2022 - 10/2022

Food Delivery Routing Optimization project

- Created an efficient routing system for a food delivery application using C++
- Optimized algorithms to minimize delivery time and resource usage

Trip Manager Application

📅 11/2022 - 12/2022

Trip Manager Application with emphasis on user-centered design

- Designed a user-friendly trip management UI/UX prototype using Figma
- Focused on accessibility and intuitive navigation to enhance user satisfaction

Plant Disease Detection

📅 05/2025 - 05/2025

Built a Plant Disease Detection Model using Machine Learning & NLP

- Used Python and image datasets to train a model that identifies plant diseases from leaf images. The system was tested and achieved over 90% accuracy.

INTERESTS

Outing and Gym

Enjoys spending time outdoors and keeping fit
